

EDUCATION

Bachelor of Technology in
Computer Science

Future Institute of Technology
(MAKAUT), Kolkata, 2014 – 2018

TECHNICAL EXPERTISE

- Salesforce: Lightning Web Component (LWC), Aura Component, Apex, Test Class, Trigger, Lightning Flow, Workflow, Approval Process, Validation Rules, Assignment Rule.
- Asynchronous Apex: Batch Apex, Queueable, Future, Scheduled Apex.
- Salesforce Integration: Inbound and Outbound Integration, Real Time, Point to Point, Bulk Integration, worked on REST API, Remote Site Settings, Connected App, OAuth 2.0, Named Credential for seamless integrations.
- Security & Access: Profiles, Permission Sets, Roles, OWD, Sharing Rules, Apex Sharing.
- Salesforce Einstein Gen AI: Einstein Gen AI, Prompt Builder, Salesforce Agent, Einstein Analytics Studio, Prediction Builder, Recommendation Builder, Einstein Next Best Action, Data Masking, Trust Layer.
- Technical Languages/Technologies: Apex, SOQL, SOSL, HTML, CSS, JavaScript (ES6+), SQL.
- Salesforce Tools: VS Code, Workbench, Salesforce Inspector, Data Loader, Postman, Git.
- Methodologies: Agile, Scrum, JIRA.

CERTIFICATIONS

- Salesforce Administrator (Salesforce)
- Salesforce Platform Developer I (Salesforce)
- Salesforce AI Associate (Salesforce)

PROFILE SUMMARY

Salesforce Developer with 5 years 10 months of experience delivering end-to-end Salesforce solutions across Life Sciences, Energy, Banking, and Telecom domains. Specialized in Salesforce Administration, Lightning Web Component (LWC), Apex Development, System Integration, and Einstein Gen AI. Proven ability to architect and implement scalable, secure, and high-performance applications using Salesforce best practices. Currently working as a Senior Developer, leading feature delivery, participating in client discussions, and mentoring junior team members. Demonstrated success in increasing automation efficiency by 35%, delivering AI-driven use cases, and improving system performance through well-architected integrations. Recognized for strong ownership, problem-solving skills, client handling and cross-functional collaboration in Agile environments, with a consistent focus on delivering business-aligned, high-impact Salesforce solutions.

PROFESSIONAL EXPERIENCE

Capgemini | Industry: Life Science | Aug 2023 – Present

Tenure: 2 Years 9 Months

Role: SALESFORCE SENIOR DEVELOPER/TECH LEAD

- Developed and delivered 20+ scalable Salesforce solutions using LWC, Aura, Apex, Flows, and Asynchronous Apex, improving user experience and process efficiency. Optimized data models and SOQL, reducing execution time by 25% and enhancing system responsiveness.
- Led end-to-end Salesforce–ERP integration using REST APIs for real-time data synchronization. Designed and deployed Einstein AI solutions, covering tool evaluation, use case implementation, and production rollout—boosting operational efficiency by 30%.
- Analyzed user stories, defined technical architecture, and implemented custom logic and automation using best practices. Enhanced system performance through query tuning, scope refinement, and supported deployment activities and post-release validations.
- Managed a team of 8 developers, driving task allocation, peer reviews, and sprint deliverable tracking. Collaborated with Business Analysts and Testing Leads to ensure technical delivery met business needs and acceptance criteria.
- Worked closely with clients and product owners during grooming sessions, backlog reviews, and technical discussions to shape implementation strategy. Conducted client demos, addressed review feedback, and delivered hyper-care support post go-live.
- Managed backlog hygiene and reviewed IP/IQ documentation, addressed client comments, led POCs for new features, and facilitated handover and knowledge transfer to production support teams. Monitored sprint progress, ensured timely delivery of user stories, and maintained team velocity through effective use of JIRA dashboards and workflows.

Capgemini | Industry: Energy System | Mar, 2023 – Jul, 2023

Role: SALESFORCE SENIOR DEVELOPER

- Delivered timely production support by troubleshooting and resolving issues related to data discrepancies, user access, and process automation errors—ensuring minimal disruption and maintaining high system availability for business stakeholders.
- Supported end users in navigating the Salesforce platform by providing hands-on guidance, resolving real-time operational issues, and reducing recurring incidents by proactively identifying root causes and implementing permanent fixes.

Accenture | Industry: Banking | Mar, 2020 - Jun, 2022

Role: SALESFORCE DEVELOPER

- Designed and developed scalable business solutions by translating user stories into features using Lightning Web Components (LWC), Aura Components, and Lightning Flows. Ensured robust security and governance across the platform through meticulous setup of Profiles, Roles, Permission Sets, and object-level configurations.
- Implemented custom logic using Apex Triggers, Batch Apex, and Queueable Apex, with well-structured test classes ensuring reliable deployment. Leveraged Data Loader, Workbench, and Import Wizard for efficient data operations, and created dynamic Reports and Dashboards to empower stakeholders with actionable insights.

Accenture | Industry: Telecommunication | Feb, 2019 – Feb, 2020

Role: QA Support

- Validated complex datasets and system functionality across diverse scenarios by executing comprehensive test cases and leveraging advanced SQL and PL/SQL queries—ensuring high data accuracy, performance, and business rule compliance.
- Documented test outcomes, managed defect lifecycle, and supported QA teams by running optimized queries for deep data verification—strengthening quality assurance and building a strong foundation in data-driven testing and analysis.
